When I write the word “comics,” many images and ideas might spring to mind for the reader. Maybe it is first the action figure or bombastic film that occupies a child’s life that you know, or maybe a stack of floppy magazines ready to throw into the trash. Comic strips might come to mind, or the colorful images of middle grade graphic novels.

Whatever that image is for you, I can confess in all honesty that I have learned so much about the wide range of comics through my years as a reader and teacher. What began as a fascination with heroic characters has turned into an appreciation for a medium (notably, one in which many genres can be presented).

When I began teaching English in 2007, I was fairly skeptical. I had not read comics since the late 1990s, and though I still visited the options at my local bookstore, I did so with a feeling of hesitance and even shame. I thought, What if one of my students saw me reading these books? Surely, as a teacher with a master’s degree, I should be reading Shakespeare or John Updike or some other author whose notable distinction as a literary voice held sway.

What I have learned since then from spending time with comics, as well as from scholars in literacy – and even from my students – is that any type of story can be told in comics, and that feeling of shame that I carried with me for enjoying them was out of place.

A Vision of a Life

One of the major elements of reading books that I have grown to appreciate more and more is the way an author can speak across pages, times, spaces, and even centuries to help a reader know that they are not alone. As I have shared in other NCTE posts, when I look back on the titles that I assigned in my first few years of teaching, I am struck by how male-centered and white-centered they were.

We know from the work of Sims Bishop (1990) that readers need to see themselves represented on the page, and they need to be able to take a peek into the lives of those who may not be like them in all ways.

continued…
Apart from gaining new vocabulary and unlocking complex texts – which is valuable work, to be sure – books are invaluable as cultural artifacts that build upon the inner life and improve the human condition.

When I read *Constellations* by Kate Glasheen, I am struck by the semi-autobiographical story of an author and artist who grew up in much the same time I did, but whose experiences were vastly different. While I was figuring out what it meant to be a kid growing up in a rural small town and exploring questions of fitting in, Kate was exploring their own questions.

When I read *Unflattening* by Nick Sousanis, a dissertation published in comics/graphic novel form, I am struck by the ways words and images combine to share a researched narrative of symbolic and philosophical depth. It is definitely a book to reread.

Both of these examples are complex in their own ways – and both are rendered in comics form.

What about the tried-and-true superhero books that have been popular for decades? Yes, even these books cause me to think. When I revisit the narrative of Bruce Wayne/Batman, I see a character who was wounded as a child and who discovered a sense of agency in imaginative ways. While nowhere near to the ways I would find my own voice and work, this book inspired me as a young reader.

**A Number of Approaches**

So, empathy is one avenue. What about the standards-based work I have to do as a teacher? As someone who is currently in the high school classroom, has spent almost a decade in the middle school classroom, and has worked at the college level, I can safely and reasonably share that comics are useful for virtually any type of reading and writing activity that a teacher wants to explore.

The *Science Comics* and *History Comics* series capture information-based ideas in creative and visually appealing ways. Adaptations have their value for comparative thinking, and comics of any genre – from memoir to Western to science fiction – include the possibility for thinking about characterization and character development, themes, plot development, vocabulary knowledge, engagement with challenging text, thinking about ideas across types of texts, sharing our own adaptations, explaining processes, engaging in digital creation and revision, exploring grammatical forms, developing visual and verbal persuasive techniques, and even considering how the words on the page can be elevated for speaking and listening. If all of these possibilities sound familiar, that is because I was running through the catalog of state standards I am required to teach and thinking about how I’ve linked them to comics.

I also want to be clear – not all students will have their lives changed by comics. They are not the magic button to the top tier of literacy for all students, and that is why we need rich and robust classroom libraries and meaningful curricula to engage and develop readers. However, there certainly are those students who discover their reading superpowers in the pages of comics.

In short, the visuals and words that are part of these texts, to say nothing of the design features and imagistic motifs, can not only build criticality – they can help us become better humans, if we answer the literary call.

– Jason D. DeHart, PhD

Want to Learn More?

I have continued to explore comics as I have talked with authors and illustrators for my podcast, and as I have edited book collections. I am pleased to share that there is much more for teachers to consider. In *Building Critical Literacy and Empathy with Graphic Novels* (NCTE, February 2024), I explore and unpack lesson plans, instructional steps, and loads of examples from comics I have used in practice.

This book features examples of how graphic novels can be used to link to critical questions and engaging topics, and I share from reading, writing, and composing work I have put into practice. The book also includes words from a number of authors and artists, including Jarrett Lerner, Andy Runton, Chad Sell, Duncan Tonatiuh, Sara Varon, and many others.

I sincerely hope that you are inspired by the book and not only try out some of the ideas, but also put your own spin on them for the needs of your students. And I am always glad to talk comics and teaching as a colleague and supporter of the work you are doing in literacy.

AN INTERVIEW WITH AUTHOR

Maysoon Zayid

Maysoon Zayid is a comedian, actress, writer, and disability advocate, as well as the co-founder of the New York Arab American Comedy Festival and The Muslim Funny Fest. In this interview, she discusses her debut graphic novel *Shiny Misfits* – a hilarious story about fame, friendship, and fighting to take back your own story. She discusses her background, creative process, and what messages she’d like readers to take away from her work.

**How did you become a writer?**

My parents couldn’t afford physical therapy, so they sent me to dance school. I grew up dreaming of being a performer, and most of all I wanted to be on TV. But historically, the media shuns disability. So where I saw myself was in the world of stand-up comedy, and I became a comedian. Comedians have to write jokes every day. I started writing, and I never stopped. I wrote my best-selling memoir, and now I’ve written *Shiny Misfits*. I feel like every joke I wrote over the past two decades has been preparing me for this.

*continued...*
What have been the biggest influences – people or experiences – in your work?

My influences are so varied. My grandmothers and my mother were a huge influence on me, and so were all my aunts. They were cinematically strong, kind, and funny women. I was lucky to have role models like them in a time when women were more often seen than heard. My dad is also an enormous influence on me. He was a true girl dad, my number one cheerleader, and he literally taught me how to walk. My can-can attitude is based off his mantra “You can do it. Yes you can-can.” And then there are those larger-than-life influences: Oprah, Beyoncé, Shakira, Serena Williams, Dolly Parton, Dave Matthews, Betty White, and of course Judy Blume.

What was your creative process like for this book?

The creative process for Shiny Misfits was the culmination of a lifetime of figuring out how to do things that my cerebral palsy (CP) made impossible… possible. I am a lifelong comic book fan, so it was really important for me to honor the tradition of comic books in the form of a graphic novel. My CP causes me to shake all the time, so typing is nearly impossible. Which means I have to dictate the entire book, panel by panel, to my typist. I am used to dictating words. I dictated my memoir Find Another Dream and several movie scripts, but this was so different because I was also dictating images. Enter Shadia Amin. I could not have dreamt of a better illustrator for my dream book. Her illustrations are exactly what I imagined, except even better. She’s a unicorn.

If there was one message that you’d want every reader of this book to hear, what would it be?

Fitting in is fine, but being a misfit is marvelous. Don’t be a bully or a mean girl – it’s not as cool as it looks on screens. Words matter. Equality matters. Disabled lives are worth living. Whenever you can choose fun, choose it. Failure is always an option, and we learn from every single failure. There’s more than one message, and I’m starting to sound like Maria, the guidance counselor from Shiny Misfits, so I will end with this: If no one cheers for you, cheer for yourself.

Duel
Jessika Bagley
Simon & Schuster Books for Young Readers • 2023 • MS
Sixth-grader Lucy loves fantasy novels and is brand new to middle school. GiGi is the undisputed queen bee of eighth grade (as well as everything else she does). They’ve only got one thing in common: fencing. Oh, and they’re sisters. They never got along super well, but ever since their dad died, it seems like they’re always at each other’s throats. As the clock ticks down to the girls’ fencing bout, the anticipation grows. Their school is divided into GiGi and Lucy factions, complete with T-shirts declaring kids’ allegiances. Both sisters are determined to triumph. But will winning the duel mean fracturing their family even further?

Age 16
Rosena Fung • Annick Press • 2024 • YA
From the highly acclaimed creator of Living with Viola, a powerful YA coming-of-age graphic novel about three generations of mothers and daughters passing down and rebelling against standards of gender, race, beauty, size, and worth. Told in alternating perspectives, Age 16 shifts between time and place, exploring this pivotal year in adolescence. Fans of Faith Erin Hicks, Mariko Tamaki, Jen Wang, Tillie Walden, and Kevin Panetta will love this book.

Francisco Jiménez • Clarion Books • 2024 • MS
An honest and evocative account of a family’s journey from Mexico to the fields of California—and to a life of backbreaking work and constant household moves—as seen through the eyes of a boy who longs for education and the right to call one place home. Poignantly told from a young boy’s perspective, the popular and award-winning memoir centered on a Mexican family working California’s fields is now a powerful graphic novel that will appeal to readers of Illegal and They Called Us Enemy.
