Follett is excited to announce Shannon McClintock Miller will be offering add-on PD consultation and courses to complement our offerings. An experienced teacher librarian, speaker, consultant and author, Shannon gained a large following with her The Library Voice blog. She now serves as an ambassador of the Future Ready Libraries initiative and K-12 District Teacher Librarian at Van Meter Community School in Van Meter, Iowa. Shannon is available to consult on topics such as being a change maker in education, promoting Makerspace in the library, collaborating with teachers, and using technology and social media to connect students and their community with the world.

### ALL-DAY WORKSHOPS

#### Lead from the Library Like a Rock Star

Let’s come together to make a difference in our libraries and throughout the world! Join us for a high-energy day as we bring out the rock star librarian in all of us.

Shannon McClintock Miller will kick off our day together exploring the critical role we play in the strategic work of libraries, schools, educational systems and within the lives of our students. She will share stories and inspire us to embrace the transformational leadership roles of librarians, including educational technology and digital citizenship champions, empowering students as creators and learners, community builders, content curators, innovative instructional practitioners and partners and more.

Shannon will challenge you to look at your own performance, qualities and perceptions of librarians too.

Throughout the day, you will learn how to strengthen your leadership skills, deepen your knowledge in a variety of ways and develop an action plan that will be instrumental as you begin to shape your professional future, as well as the future of those you serve from your library and through various roles.

You will definitely leave this day knowing you have what it takes to make a difference as an innovative, collaborative, game-changing librarian ready to shake things up from the library and throughout the world by leading the way and being heard!

#### Digital Tools to Connect, Create and Collaborate

Our students love being engaged and connected to their learning, passions and technology. We have the opportunity to give them the tools they need to collaborate, connect and create with others not just in their classroom and school, but around the world. In this session, participants will learn how to use a variety of digital tools to do just that...Connect, Collaborate and Create! Shannon will tell stories, show a number of amazing digital tools and give real-life examples that worked for her in the library and classroom. You will walk away with a rich toolbox filled with things you can put into practice with teachers and students. This can also be a breakout session.

#### Tools and Tips for The Future Ready Librarian

Shannon McClintock Miller shares tools and tips that tie into each one of the wedges of the Future Ready Librarian Framework, as well as how it ties into literacy, our students and the work we do every day.

### BREAKOUT SESSIONS

#### These Are a Few of My Favorite Things

In this presentation, Shannon will share a few of her favorite things including educational resources, digital tools and apps, and some tricks and tips that have worked for her. You will hear about each and real-life examples of how they have worked for Shannon, her students and other educators. You will gain lots of inspiration and creative thoughts from this presentation, along with your very own toolbox filled with a few of your new favorite things.

#### Celebrating Good News and Innovation in Libraries

Change the lyrics in your library! After years of gloom-and-doom library headlines, dedicated teacher-librarians are writing a new song, celebrating the library's key role in shaping a generation of critical and creative thinkers. Weaving bedrock skills like inspiring a love of reading with today's hottest resources – print and digital – Future Ready teacher-librarian Shannon shares some of her favorite ideas for engaging both students and your fellow educators in what the library has to offer. You will gain lots of inspiration and creative thoughts from this presentation, along with your very own toolbox filled with a few of your new favorite things too!

*When the makers create, when the teachers collaborate*

*When I’m feeling inspired*

*I simply remember my favorite things*

*And then I know I can!*

#### Digital Tools and Apps that Inspire Storytelling and Creativity

Our students love telling their stories in creative and unique ways. Through technology and with access to so many wonderful digital tools and apps, we can now give children new ways to tell their stories within all areas of the curriculum. In this presentation, Shannon will share several digital storytelling tools and apps that will enhance creativity within your libraries and classrooms. You will learn how to use these tools and hear project ideas for each. The digital tools, along with engaging and exciting ways to use them, will inspire the creativity in storytelling that you are looking for this year!
BREAKOUT SESSIONS

Bringing a New Voice to Libraries, Students and Education through Makerspaces
There are so many ways that libraries and schools are being redesigned and changing. One way is by the addition of Makerspaces, which are adding new places for creativity, collaboration and connections. When Shannon and her students added a Makerspace and tools like a Makerbot 3D printer, LittleBits, knitting and “Maker Lunches” to the library, little did they know what it would bring to the entire school community. Shannon will share this story, among other ideas such as Makerspaces-To-Go, Mobile Makerspaces and Musical Makerspaces. She will discuss schedules, storage and tying this into curriculum. She will also share how she is using library resources such as eBooks, databases and books, and how digital tools can enrich and engage this community as well. You will leave this session with ideas from Shannon’s Makerspace as well as several others she will showcase in a Makerspace Show-n-Tell during the session.

15 Digital Tools (and a few extra) and Projects for Your Library & Classroom
Our students love being engaged and connected to their learning, passions and technology. We have the opportunity to give them the tools they need to collaborate, connect and create with others not just in their classroom and school, but around the world. In this session, participants will learn how to use a variety of digital tools to do just that...Connect, Collaborate and Create! Shannon McClintock Miller will tell stories, show a number of amazing digital tools, and give lots of real-life examples that worked for her in the library and classroom. You will walk away with a rich tool box filled with things you can put into practice with teachers and students.

Everybody Code: Teaching and Learning an Essential 21st-Century Skill
Students need to have the opportunity to learn computer science. It supports logic, problem-solving skills and creativity. There are wonderful, free digital tools, apps and programs that are available to help librarians, educators and parents support our students in developing these skills. And by starting young, they will have a foundation for success in 21st-century career paths. In this presentation, Shannon will explain the importance of learning to code and how to work it into the classroom and library through various events, programs and digital tools and apps. You’ll enjoy a fun day of learning and have many new ideas to bring to your school community.

iPad Apps to Support Literacy: Within the Library and Throughout the School
A key challenge at any school is to increase student literacy – and one fun and effective way of doing this is by using iPads®. In this session, Shannon will share a variety of ways in which iPads can be used within the library and throughout the school to support and promote literacy for all students. Come discover a wide variety of iPad apps that support reading and creativity, while bringing fun and excitement to the curriculum and school.

BREAKOUT SESSIONS

Just How Do You Become a Connected School Leader and Make a Difference?
Have you ever thought you were a connected school leader just by having a Twitter account or by listening to a webinar? In this presentation, Shannon will show you what it truly means to be connected through social networks and participation in various activities as you develop your very own personal learning network. She will provide information on how she has made a difference within her school community, librarianship and education by being connected.

Let’s Get Moving, Creating, Reading and Inspired with a Musical Makerspace
Makerspaces are all the rage! Have you thought about creating one that focuses on integrating music, dance, reading, movement, instruments and singing into a Musical Makerspace? Through the use of music, stories and song within education, we have the opportunity to enhance creativity, learning, reading, play and so much more. In this fun, music-filled presentation, Shannon will show you how you can bring a Musical Makerspace to your school and library too.

Igniting Innovation and Creativity in Our Makerspaces with Digital Tools and Apps
With Makerspaces popping up in schools, libraries and public spaces, there is also a place for the digital tools and apps that we can use to ignite innovation, model design thinking and create amazing projects and digital stories. Have you thought about using a stop-motion app to have students record the story they wrote for their LEGO® or Minecraft world? How about using a digital storytelling tool to share the process of how they created a new invention or recreated a historical event in the Makerspace? How about the ability to find resources, project ideas and online communities for our makers? Shannon will connect you to several digital tools and apps that enhance, engage and inspire our students as makers and within Makerspaces.

Build Your Own Video Game and Digital Projects with Bloxels
Young people love playing video games and using digital tools! What if we could put the technology into their hands that made it possible for them to build their own video games? What if they could use these tools to tell stories and share knowledge? This is possible with Bloxels®! With Bloxels, our students can create their own video games, share them and even play others from around the world. In this presentation, Shannon will tell you all about Bloxels and show you several really cool ideas about how to integrate Bloxels into your libraries and classrooms through awesome projects and experiences. You will even have a chance to play and create with Bloxels too!
BREAKOUT SESSIONS

Leading Curation in Your Schools
Wondering where to start with the curation of your library collection and with OER content curation and creation? Shannon will share the process and favorite OER resources, as well as tips for organizing and housing your content as you curate and create. And find out how new features in Follett Destiny® Library Manager will help facilitate librarian/teacher collaboration to build the best collections using print and digital content already in your library combined with OERs.

Lead from the Library with Creative Branding and Marketing
It is time to lead from the library, and you might be wondering how to share that message and your goals and vision with others. With creative branding and marketing you can bring your library story to life, while leading within your school community and throughout the world like never before. In this session, Shannon will share several branding and marketing ideas that will help you share your library story in memorable, effective and valuable ways. You will explore the why and the how of library branding and marketing, while taking a look at specific tools and examples to communicate your story.

Lead from the Library with Creative Advocacy and Branding
Now is the time for librarians to lead, and leadership takes strategy and courage! As you look for innovative ways to share the story and voice of your library, including the voice of your students, with the rest of your school and district you’ll uncover allies and skills you didn’t realize you possess. With creative advocacy and branding, you can bring your library story to life, while leading within your school community and throughout the world like never before. In this session, Shannon will share advocacy and branding ideas and strategies designed to empower you and share your own library story, goals and vision in memorable, effective and valuable ways. Miller will share the why and the how of library advocacy and branding, while taking a look at specific resources and examples to communicate your story.

Building an Amazing Virtual Library for Our Community
Today’s libraries ignite creativity and curiosity; promote reading, collaboration and inquiry; and foster an amazing community that offers so much to our students, teachers and families while connecting to the world. The virtual spaces we create are also an essential piece of our libraries. In this session, Shannon will share how to create virtual library spaces with these characteristics. She will demonstrate creative ways to curate, unique tools to develop online reading communities, digital tools to build collaborative spaces, exciting ways to engage a global community and much more. You will leave this presentation ready to build an amazing virtual library for your community too.

BREAKOUT SESSIONS

Creating a Teaching and Learning Atmosphere of Digital Citizenship
Being a teacher-librarian within a 1:1 school for eight years, Shannon was the educator who led the charge of digital citizenship within her school district, working with all the K-12 students, teachers and parents. In this presentation, Miller will share the importance of defining, teaching and modeling digital citizenship – and what that means for students and educators. In today’s climate, it’s more important than ever to understand how you can best empower every student, even the very young, to become responsible digital citizens and critical consumers of information. Join us and learn how you can do the best job possible in teaching and supporting digital citizenship in your school. You will be ready to create a plan to empower and lead your students to be successful digital citizens.

My Favorite Things: Celebrating Good News and Innovation in Libraries
Change the lyrics in your library! After years of gloom-and-doom library headlines, dedicated teacher-librarians are writing a new song, celebrating the library’s key role in shaping a generation of critical and creative thinkers. Weaving bedrock skills like inspiring a love of reading with today’s hottest resources—print and digital—Future Ready teacher-librarian Shannon McClintock Miller shares some of her favorite ideas for engaging both students and your fellow educators in what the library has to offer. You will gain plenty of inspiration and creative thoughts from this presentation, along with your very own toolbox filled with a few of your new favorite things.

25 Best Websites that Rock Each Year
For the past five years, the American Association of School Librarians’ Best Websites for Teaching and Learning Committee has selected 25 websites that will enhance classrooms and libraries. Over the past year, the committee celebrated their 200th website, and this year 25 more were added. Join this session and learn about the winners. Shannon will focus on amazing websites from six categories including Media Sharing, Digital Storytelling, Manage & Organize, Social Networking & Communication, Content Resources and Curriculum Collaboration. It will be a fun presentation that will leave you with plenty of ideas and wonderful bookmarks and handouts to take with you back to your students, teachers and school community.

KEYNOTES

Let Them Be Heard: Giving Our Students a Voice
Young people have the opportunity to change the world with their actions, creativity, words and most of all…their voice. Shannon has empowered her students and others to embrace and talk about the things that are important to them. In this presentation, you will hear the voice of young people as Shannon shares stories of choice, experiences, access, space, collaboration, creativity and so much more. As you prepare for this day and her presentation, ask yourself this question: What is important to me and my learning? We will answer this question together as we take a look at our learning, and most of all, that of the young people we work with every day.

Be the Change You Want to See
Shannon believes that educators can empower others to use communication, creativity, social media, collaboration and connections to make a difference. In this keynote session, Shannon will empower all of us to “Be the Change” by focusing on what we need to do to create and foster changes that are happening within the library and education. She will highlight several trends and inspire us to listen to the voice of our young people to truly make this change happen within our school communities. You will leave the keynote ready to be the change we all need to be.

SPARK Connections in Your Library, Community and Around the World
As teacher-librarians and educators, we have the power to SPARK connections constantly by being savvy, progressive, advanced, radical and knowledgeable. In this keynote, Shannon will dive into each of the traits that we need to take on in our roles and for the future of our children and profession. Shannon will share ways we can do this through personal stories and examples from others around the country. You will definitely leave this session with answers when you ask yourself how YOU will SPARK connections in your library, community and around the world.

“I love what I have found with the Digital Citizenship Connect Course. I am learning so much and putting these skills to use as I dive into various resources, methods and information focused around digital citizenship.”

SHANNON MCCLINTOCK MILLER
