

Try it before you buy it.

Limited Time Offer. Only the first 100 Applications received can participate.

Dremel 3D Experience

Try the Dremel Idea Builder FREE for 30 Days.

Dremel wants your school to try its Idea Builder for 30 days. Our goal is to make it easy and fun for you and your students to try 3D printing in your classroom.

How do I request a demo printer?

Go to follettlearning.com and fill out the form. Once you submit your request, we will review your application. If your school has been selected to participate in the program, you will be notified by email with an expected deliver date for your Idea Builder.

How does "Try it before you buy it" work?

Will the demo printer be ready to print when I receive it?

Almost. Remember, these are new units, so there is some setup required. Plug it in, load the filament, level the build plate, and you're ready to go. Follow the steps in the Quickstart Guide, under the Support tab on Dremel3D.com

Is there a cost to the trial?

The only costs you will incur are the UPS charges (approximately \$60.00) for shipping the printer back to Dremel at the conclusion of your trial if you choose not to purchase.

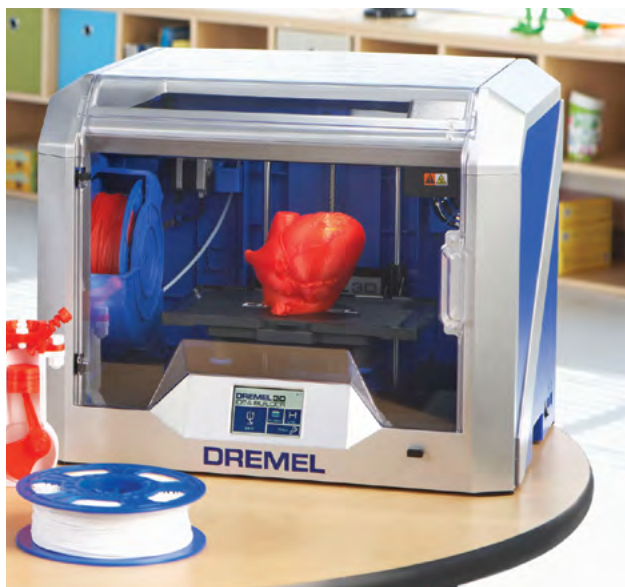

How do I return the printer to Dremel if I choose not to purchase?

At the conclusion of your demo, return the Dremel 3D Idea Builder IN THE ORIGINAL PACKAGING to:

Dremel & Roto Zip Services Center
4915 21st Street
Racine, WI 53406

What if I forget to return it?

We want as many schools as possible to have a chance to demo these printers so it's important that they're returned to us on time. We'll be sending you emails throughout your trial, including a reminder that your trial is almost up, but if you're more than 7 days late and we are unable to reach you, we will invoice your school for the price of the printer.
