The most fun and engaging way for students to learn!

Give your students exciting technology tools that use Augmented Reality and digital storybooks to promote literacy and math development. These supplemental, full-year curriculum tools are aligned to Common Core and TEKS and are designed for students in preschool through third grade. Using kinesthetic, visual and auditory learning modalities, the daily lessons and activities appeal to a wide range of learning styles and increase retention. This product is great for ELL and Special Education classrooms!

- Can the frog swim?
Letters alive®

Letters alive is a supplemental reading learning kit that incorporates research-based best practices to teach early literacy skills. The lessons and activities are presented using kinesthetic, visual and auditory modalities, which apply to all students including ELLs/DLLs and those in special education. The kit includes a full-year curriculum aligned to Common Core and TEKS with 26 alphabet cards and 94 sight word cards that spring to life in 3-D through the advanced technology known as Augmented Reality.

Math alive®

Math alive is a software-based learning kit, which includes interactive games and activities that teach necessary math concepts to early learners. The software features an exciting technology known as Augmented Reality, which creates a 3-D experience without glasses and provides kids with an exciting and hands-on way to learn. Math alive engages all learners and encourages them with verbal affirmations.
